AUTHOR INDEX

Angus, J.F., *see* Stein, J.A. et al.
Arts, W.B.M., *see* Perdok, U.D. and Arts, W.B.M.
Ayers, P.D. (Fort Collins, CO, U.S.A.)
Utilizing the torsional shear test to determine soil strength–properties relationships 373
Bannink, M.H., *see* van Lanen, H.A.J. et al.
Bouma, J., *see* van Lanen, H.A.J. et al.
Canarache, A. (Bucharest, Romania)
Romanian experience with land classification related to soil tillage 39
Chandler, H.W. (Newcastle-upon-Tyne, Gt. Britain) and Stafford, J.V. (Bedford, Gt. Britain)
A simple field test for predicting ease of cultivation 269
Dexter, A.R. *see* Jakobsen, B.F. and Dexter, A.R.
Domżał, H. and Słowińska-Jurkiewicz, A. (Lublin, Poland)
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Doran, J.W., *see* Wilhelm, W.W. et al.
Douglas, J.T. and Goss, M.J. (Wantage, Gt. Britain)
Modification of pore space by tillage in two stagnogley soils with contrasting management histories 303
Ellis, J.R., *see* Wilhelm, W.W. et al.
Elonen, P., *see* Håkansson, I. et al.
Fischer, R.A., *see* Stein, J.A. et al.
Gameda, S., Raghavan, G.S.V. McKyes, E. (Ste-Anne de Bellevue, Que., Canada) and Theriault R. (St. Jean-sur-Richelieu, Que., Canada)
Subsoil compaction in a clay soil. I. Cumulative effects 113
Gameda, S., Raghavan, G.S.V., McKyes, E. (St-Anne de Bellevue, Que., Canada) and Theriault, R. (St. Jean-sur-Richelieu, Que., Canada)
Subsoil compaction in a clay soil. II. Natural alleviation 123
Goss, M.J. *see* Douglas, J.T. and Goss, M.J.

McMahon, T.A., *see* Porter, M.A. and McMahon, T.A.
Mielke, J.S., *see* Wilhelm, W.W. et al.
Ossemerct, C., *see* Ide, G. et al.
Perdok, U.D. and Arts, W.B.M. (Wageningen, The Netherlands)
The performance of agricultural tyres in soft soil conditions 319
Pimentel, D., Book review of *Soil Conservation, Assessing the National Resources Inventory, Vol. 2*, National Academy Press 193
Porter, M.A. and McMahon (Parkville, Vic., Australia)
Simulation of change in bulk density of the cultivated layer in a swelling clay soil 147
Raghavan, G.S.V., *see* Gameda, S. et al.
Raghavan, G.S.V., *see* Håkansson, I. et al.
Rasmussen, K., *see* Håkansson, I. et al.
Riley, H., *see* Håkansson, I. et al.
Römkens, M.J.M., *see* Lehrsch, G.A. et al.
Sageman, A.R., *see* Stein, J.A. et al.
Schepers, J.S., *see* Wilhelm, W.W. et al.
Słowińska-Jurkiewicz, A., *see* Domżał, H. and Słowińska-Jurkiewicz, A.
Stafford, J.V., *see* Chandler, H.W. and Stafford, J.V.
Steen, E. and Håkansson, I. (Uppsala, Sweden).
Use of in-growth soil cores in mesh bags for studies of relations between soil compaction and root growth 363
Stein, J.A., Sageman, A.R., Fischer, R.A. and Angus, J.F. (Canberra, Australia)
Soil nitrogen supply of wheat in relation to method of cultivation 243
Stroup, W.W., *see* Wilhelm, W.W. et al.
Theriault, R., *see* Gameda, S. et al.
Van Lanen, H.A.J., Bannink, M.H. and Bouma, J. (Wageningen, The Netherlands)
Use of simulation to assess the effects of different tillage practices on land qualities of a sandy loam soil 347
Van Ouwerkerk, C., *see* Wilson, G. and van Ouwerkerk, C.
Van Ruymbeke, M., *see* Ide, G. et al.
Van Wijk, A.L.M., *see* Håkansson, I. et al.
Voorhees, W.B. (Morris, MN, U.S.A.)
Assessment of soil susceptibility to compaction using soil and climatic data bases 29
see Håkansson, I. et al.
Wilhelm, W.W., Schepers, J.S., Mielke, L.N., Doran, J.W. Ellis, J.R. and Stroup, W.W. (Lincoln, NE, U.S.A.)
Dryland maize development and yield resulting from tillage and nitrogen fertilization practices 167
Whisler, F.D., *see* Lehrsch, G.A. et al.
Wilson, G. (Ottawa, Ont., Canada)
Pedotechnology and tillage research 55

Wilson, G. (Ottawa, Ont., Canada) and van Ouwerkerk, C. (Haven, The Netherlands)
Pedotechnique, the link between pedology and engineering 1
Wolf, D. (Haifa, Israel) and Hadas, A. (Bet Dagan, Israel)
Determining efficiencies of various moldboard ploughs in fragmenting and tilling air-dry soils 181

SUBJECT INDEX

Agricultural vehicles
Determining efficiencies of various moldboard ploughs in fragmenting and tilling air-dry soils 181
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259
The performance of agricultural tyres in soft soil conditions 319
Arid soils
Seedling emergence and yield of pearlmillet on naturally crusted arid soils in relation to sowing and cultural methods 103
Australia
A computer simulation model for soil temperatures in Australian cereal cropping 131
Axle load
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259
Basic
Transport Models for Soil–Plant Systems (book review) 194
Bulk density
Simulation of change in bulk density of the cultivated layer in a swelling clay soil 147
Soil surface roughness as influenced by selected soil physical properties 197
Cereals
A computer simulation model for soil temperatures in Australian cereal cropping 131
Subsoiling: time dependency of its beneficial effects 213
Clay soil
Subsoil compaction in a clay soil. I. Cumulative effects 113
Subsoil compaction in a clay soil. II. Natural alleviation 123
Climate
Assessment of soil susceptibility to compaction using soil and climatic data bases 29
Romanian experience with land classification related to soil tillage 39
Compaction
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Land evaluations that consider soil compaction 21
Assessment of soil susceptibility to compaction using soil and climatic data bases 29
Pedotechnology and tillage research 55
Subsoil compaction in a clay soil. I. Cumulative effects 113
Subsoil compaction in a clay soil. II. Natural alleviation 123
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259
The performance of agricultural tyres in soft soil conditions 319
Use of in-growth soil cores in mesh bags for studies of relations between soil compaction and root growth 363
Crop production
Trickle Irrigation for Crop Production — Design Operation and Management (book review) 191
Cultivation
Seedling emergence and yield of pearlmillet on naturally crusted arid soils in relation to sowing and cultural methods 103
Soil nitrogen supply of wheat in relation to method of cultivation 243

A simple field test for predicting ease of cultivation 269
Data bases
Assessment of soil susceptibility to compaction using soil and climatic data bases 29
Pedotechnology and tillage research 55
Deformation
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Engineering
Pedotechnique, the link between pedology and engineering 1
Fertilization
Dryland maize development and yield resulting from tillage and nitrogen fertilization practices 167
Fragmentation
Determining efficiencies of various moldboard ploughs in fragmenting and tilling air-dry soils 181
Freezing
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259
Humid regions
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259
Irrigation
Trickle Irrigation for Crop Production — Design Operation and Managment (book review) 191
Land classification
Romanian experience with land classification related to soil tillage 39
Land evaluations
Land evaluations that consider soil compaction 21
Land qualities
Use of simulation to assess the effects of different tillage practices on land qualities of a sandy loam soil 347
Loamy sand
Utilizing the torsional shear test to determine soil strength–properties relationships 373
Machinery
Land evaluations that consider soil compaction 21
The performance of agricultural tyres in soft soil conditions 319
Maize
Subsoil compaction in a clay soil. I. Cumulative effects 113
Subsoil compaction in a clay soil. II. Natural alleviation 123
Dryland maize development and yield resulting from tillage and nitrogen fertilization practices 167
National resources inventory
Soil Conservation, Assessing the National Resources Inventory (book review) 193
Nitrogen
Dryland maize development and yield resulting from tillage and nitrogen fertilization practices 167
Soil nitrogen supply of wheat in relation to method of cultivation 243
Pearlmillet
Seedling emergence and yield of pearlmillet on naturally crusted arid soils in relation to sowing and cultural methods 103

Pedotechnique
See Special Issue ..... pp. 1–102
Pedotechnique, the link between pedology and engineering 1
Pedotechnology and tillage research 55
Penetration resistance
Subsoiling: time dependency of its beneficial effects 213
Plant response
Assessment of soil susceptibility to compaction using soil and climatic data bases 29
Ploughs
Determining efficiencies of various moldboard ploughs in fragmenting and tilling air-dry soils 181
Porespace
Modification of porespace by tillage in two stagnogley soils with contrasting management histories 303
Red earth
Soil nitrogen supply of wheat in relation to method of cultivation 243
Relief
Romanian experience with land classification related to soil tillage 39
Root growth
Effect of soil structure on wheat root growth, water uptake and grain yield. A computer simulation model 331
Use of in-growth soil cores in mesh bags for studies of relations between soil compaction and root growth 363
Romania
Romanian experience with land classification related to soil tillage 39
Roughness
Soil surface roughness as influenced by selected soil physical properties 197
Rut formation
The performance of agricultural tyres in soft soil conditions 319
Sandy loam
Use of simulation to assess the effects of different tillage practices on land qualities of a sandy loam soil 347
Seedling emergence
Seedling emergence and yield of pearlmillet on naturally crusted arid soils in relation to sowing and cultural methods 103
Silt loam
Subsoiling: time dependency of its beneficial effects 213
Simulation
A computer simulation model for soil temperatures in Australian cereal cropping 131
Simulation of change in bulk density of the cultivated layer in a swelling clay soil 147
Effect of soil structure on wheat root growth, water uptake and grain yield. A computer simulation model 331
Use of simulation to assess the effects of different tillage practices on land qualities of a sandy loam soil 347
Soil conditions
A simple field test for predicting ease of cultivation 269
The performance of agricultural tyres in soft soil conditions 319
Soil conservation
Soil conservation, assessing the national resources inventory (book review) 193
Soil cores
Use of in-growth soil cores in mesh bags for studies of relations between soil compaction and root growth 363

Soil management
Modification of porespace by tillage in two stagnogley soils with contrasting management histories 303
Soil mechanics
Assessment of soil susceptibility to compaction using soil and climatic data bases 29
Soil physics
Transport models for soil-plant systems (book review) 194
Soil properties
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Soil surface roughness as influenced by selected soil physical properties 197
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Utilizing the torsional shear test to determine soil strength-properties relationships 373
Soil qualities
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Soil strength
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Utilizing the torsional shear test to determine soil strength-properties relationships 373
Soil structure
Subsoil compaction in a clay soil. I. Cumulative effects 113
Subsoil compaction in a clay soil. II. Natural alleviation 123
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Modification of porespace by tillage in two stagnogley soils with contrasting management histories 303
Effect of soil structure on wheat root growth, water uptake and grain yield. A computer simulation model 331
Soil temperatures
A computer simulation model for soil temperatures in Australian cereal cropping 131
Soil types
Modification of porespace by tillage in two stagnogley soils with contrasting management histories 303
Use of simulation to assess the effects of different tillage practices on land qualities of a sandy loam soil 347
Soil volume
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Sowing
Seedling emergence and yield of pearlmillet on naturally crusted arid soils in relation to sowing and cultural methods 103
Stagnogley
Modification of porespace by tillage in two stagnogley soils with contrasting management histories 303
Subsoil
Subsoil compaction in a clay soil. I. Cumulative effects 113
Subsoil compaction in a clay soil. II. Natural alleviation 123
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259

Subsoiling
Subsoiling: time dependency of its beneficial effects 213
Sugar beets
Subsoiling: time dependency of its beneficial effects 213
Swelling clay
Simulation of change in bulk density of the cultivated layer in a swelling clay soil 147
Techniques
Deformation and compaction of elemental soil volumes and effects on mechanical soil properties 5
Land evaluations that consider soil compaction 21
Simulation of change in bulk density of the cultivated layer in a swelling clay soil 147
A simple field test for predicting ease of cultivation 269
Use of in-growth soil cores in mesh bags for studies of relations between soil compaction and root growth 363
Utilizing the torsional shear test to determine soil strength–properties relationships 373
Tillage
Romanian experience with land classification related to soil tillage 39
Pedotechnology and tillage research 55
Simulation of change in bulk density of the cultivated layer in a swelling clay soil 147
Dryland maize development and yield resulting from tillage and nitrogen fertilization practices 167
Determining efficiencies of various moldboard ploughs in fragmenting and tilling air-dry soils 181
Soil surface roughness as influenced by selected soil physical properties 197
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Soil nitrogen supply of wheat in relation to method of cultivation 243
Modification of porespace by tillage in two stagnogley soils with contrasting management histories 303
Use of simulation to assess the effects of different tillage practices on land qualities of a sandy loam soil 347
Time dependency
Subsoiling: time dependency of its beneficial effects 213
Torsional shear test
Utilizing the torsional shear test to determine soil strength–properties relationships 373
Tyres
The performance of agricultural tyres in soft soil conditions 319
Water
Soil surface roughness as influenced by selected soil physical properties 197
Water uptake
Effect of soil structure on wheat root growth, water uptake and grain yield. A computer simulation model 331
Weather conditions
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Wheat
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Soil nitrogen supply of wheat in relation to method of cultivation 243
Effect of soil structure on wheat root growth, water uptake and grain yield. A computer simulation model 331

Yield

Seedling emergence and yield of pearlmillet on naturally crusted arid soils in relation to sowing and cultural methods 103
Subsoil compaction in a clay soil. I. Cumulative effects 113
Subsoil compaction in a clay soil. II. Natural alleviation 123
Dryland maize development and yield resulting from tillage and nitrogen fertilization practices 167
Subsoiling: time dependency of its beneficial effects 213
Effect of tillage and weather conditions on structure and physical properties of soil and yield of winter wheat 225
Effect of high axle-load traffic on subsoil compaction and crop yield in humid regions with annual freezing 259
Effect of soil structure on wheat root growth, water uptake and grain yield. A computer simulation model 331
